

ACKNOWLEDGEMENTS

I would first like to thank Buriram Rajabhat University for giving me the opportunity to work on this study. I would also like to convey my most sincere gratitude to my major advisor, Dr. Surachai Piyanukool, who provides me with intellectual and academic support at the times when I needed it the most.

The processors who were on my committee have given their time to read and comment on my work, which were appreciated – Dr. Saowaroj Ruangpaisan, Dr. Nawamin Prachanant, Dr. Prayoon Chaowaneenart – thank you for their insights, guideline and take the time to edit and proofread my paper and for their guidance, support and encouragement throughout the completion of this paper.

Most of all, I have been fortunate in having the incisive comments, critical ideas, advice and encouragement from those research experts, namely Lecturer Sanit Kethaisong, Mr. Cherdchai Raksain, and Mrs. Jiraporn Liamthaisong. They provided feedback and offered proof reading on a draft of this thesis. Without them, I could not have overcome my studies.

To my family, I offer my appreciation for their continuing support and unconditional love, supporting me through my education.
